EXPERIENCE

LogRocket, Remote - Technical Content Management

JANUARY 2022 - PRESENT

Freelance, Remote - Technical Writer

JANUARY 2022 - DECEMBER 2022

During my tenure in this position, I accomplished the following milestones:

- Elevated the client's prominence in the software industry through the creation of highly engaging content that resonated with their target audience.
- Amplified the client's online presence by employing effective SEO strategies, thereby significantly increasing their reach and visibility.
- Enhanced user familiarity with the client's products through the development of comprehensive technical articles and tutorials that effectively communicated their unique value proposition.
- Expanded the client's audience by skillfully transforming their video content into easily digestible written form, resulting in increased engagement and brand loyalty.
- Streamlined the client's internal processes and boosted team productivity by optimizing their software documentation, leading to better collaboration and efficiency.
- Significantly improved the client's position in the software industry by developing informative and insightful articles, tutorials, and guides that perfectly aligned with their objectives.
- Successfully drove traffic to the client's blog by leveraging SEO keywords in blog posts and promoting the content across multiple social media and publishing platforms.

• Contributed valuable content about the latest technology trends to the client's blog, thereby attracting and retaining a steady stream of engaged readers.

AngryFrogs, Remote - Frontend developer

OCTOBER 2020 - JANUARY 2021

In this role, I made the following achievements:

- Collaborated closely with the UI/UX design team to develop a visually stunning and user-friendly landing page that effectively conveyed the company's brand identity and message.
- Implemented a responsive design that ensured the landing page was accessible and easy to navigate on various devices and screen sizes.
- Developed the landing page using ReactJS, a cutting-edge front-end development framework that allowed for greater flexibility and scalability in the project.
- Utilized Web3 technology to integrate blockchain functionality into the landing page, enhancing its security and reliability.
- Employed best practices in front-end development, such as optimizing code for speed and performance, to ensure the landing page delivered a seamless user experience.
- Conducted thorough testing and debugging of the landing page to ensure it functioned flawlessly across multiple browsers and devices.
- Collaborated with back-end developers and other stakeholders to ensure seamless integration of the landing page with the company's existing systems and infrastructure.
- Actively participated in project planning and development meetings, providing valuable insights and feedback to ensure the project's success.

Remote - Software developer

OCTOBER 2020 - JANUARY 2021

During my time in this role, I made the following achievements:

- Acquired strong foundational knowledge in front-end development by working with cutting-edge frameworks such as ReactJS and AngularJS to develop responsive, user-friendly web applications.
- Gained experience in cloud engineering by working with Amazon Web Services (AWS), Microsoft Azure, or Google Cloud Platform (GCP) to develop scalable and reliable cloud-based applications.
- Developed skills in product management by contributing to the product roadmap, performing market analysis, and collaborating with cross-functional teams to deliver high-quality software products.
- Acquired expertise in continuous integration/continuous delivery (CI/CD) by using tools such as Jenkins, GitLab CI/CD, or Travis CI to automate the software build, testing, and deployment process, ensuring the efficient delivery of software products.
- Worked collaboratively with UI/UX designers to develop engaging and visually appealing user interfaces that enhance user experience and satisfaction.
- Participated in all stages of the software development life cycle (SDLC), including requirements gathering, design, development, testing, and deployment.
- Contributed to code reviews and actively participated in team meetings, providing valuable insights and feedback to improve the quality and efficiency of the software development process.

• Demonstrated a strong work ethic and a willingness to learn new technologies and tools, making significant contributions to the overall success of the internship program.
